

IN TRUST WE BUILD

ABOUT US

EUROMAX is a Bulgarian company specializing in acoustic, soundproofing and construction solutions. We believe that every building has its own soul – sound, warmth and atmosphere that create an environment for living and working.

We don't just deliver materials – we create an environment that sounds good, breathes freely and stands the test of time.

1.

ENGINEERING LOGIC.

2.

DESIGNER SOUL.

3.

HUMAN APPROACH.

EUROMAX offers comprehensive systems and solutions that make buildings smarter, quieter and more sustainable.

EVERY PRODUCT in our portfolio is a carefully selected and a proven result of engineering logic, professional experience and attention to detail.

EUROMAX delivers everywhere in **BULGARIA.**

For us, there is no "distant client" - there is only a partner we care about.

OUR PHILOSOPHY

- Our work does not begin with an offer, but with a question:
HOW DOES A PERSON WANT TO FEEL IN THIS SPACE?
- That's why we translate sensations into the language of materials
– with precision, experience, and emotion.
- Trust is built not with promises, but with integrity. We believe that warmth in
communication is as important as thermal insulation in buildings.

KEY ADVANTAGES

● HUMAN APPROACH

Communication based on honesty and respect.

● PROFESSIONALISM WITHOUT SHOWING OFF

Quality is our strongest argument.

● INTEGRATED SOLUTIONS

We think in systems, not in individual parts.

● PARTNERSHIPS, NOT DEALS

Our relationship begins, when the delivery is complete.

● TECHNOLOGY WITH A HUMAN FACE

Innovation is a means, not an end in itself.

SUSTAINABILITY AND RESPONSIBILITY

- At EUROMAX we believe that good construction means responsibility – to people, space and nature. Our goal is to create solutions that are effective today and sustainable tomorrow.

- ECOLOGICAL APPROACH – we use durable and recyclable materials.
ENERGY EFFICIENCY – our systems reduce costs and carbon footprint.
RESPONSIBLE PARTNERSHIP – we work with companies that share our values.
DURABILITY – we design for time, not for a moment.

- SUSTAINABILITY is part of our engineering logic and work ethic.

WHAT WE OFFER

SPACES THAT INSPIRATE

SOUND INSULATION
AND
VIBRATION
ISOLATION

ACOUSTIC WALLS,
SEPARATORS
AND CURTAINS

ACOUSTIC
ACCESSORIES

ACOUSTIC
LIGHTING

SOUNDPROOF
CATPODS

PAINTS AND
VARNISHES
